

# EPIC Center Webinar: FAQs

## **Healthy Start Webinar: Moving On: Supporting Transition from the Electronic Screening Tool**

On October 24, 2018 Healthy Start EPIC Center staff facilitated a webinar to support programs who will be transitioning from the current Electronic Screening Tool in the coming months.

This FAQ summarizes questions raised during this webinar. This includes questions that were answered during the call and those that we did not have time to answer.

### **Questions about REDCap**

#### **When re-administering a form to the same person, can certain fields automatically be filled in from previous visits?**

This function is available, but our site does not currently use this feature.

#### **Is it possible to migrate some data elements [e.g. demographics] across forms?**

Similar to the question above –this function is available, but our site does not currently use this feature.

#### **Do users have to build forms themselves? Does the vendor does create them for you?**

Users must build their own forms. REDCap does not have staff to create tools.

#### **Does this program include HRSA Screening Tools in its shared library?**

The shared library does not include the HRSA Screening Tools.

#### **Will a child automatically be attached to an adult in the system or do users have to match them manually?**

The infant is connected to the mother via the birth record form, case managers manually enter the child's MRN into this form.

#### **How can you identify a mother who enrolls in Healthy Start for a second time within the same 5-year funding cycle?**

Participants with multiple pregnancies are assigned a unique record ID (i.e. 1234-1, 1234-2) that represents a new pregnancy episode. We also use a field to indicate that a previous record exists.

#### **Does RedCap offer a monthly report generator?**

Yes, you can create reports to meet your programmatic needs.

### **Questions about ChallengerSoft**

#### **Is this a free program?**

No, ChallengerSoft is not a free program. For specific pricing information, please contact the vendor directly.

# EPIC Center Webinar: FAQs

**When a form times out, are data automatically saved?**

No.

**Can you edit forms after creating them?**

Yes, forms can be edited.

**Are HRSA-reportable fields consistently "required" in order to save a form?**

CORE forms do have required field in order to save a form. Screening tools do not currently have any required fields.
